On the right side, select ASP.NET Web Application. In the Name field, type Beaver. This is the code name for our video rental store application. In the Location box, specify a location to create the files on the disk. Preferably, use a local drive and not a network drive. Otherwise, sometimes you may run into security or performance issues.

A Step-by-Step ASP.NET Tutorial for Beginners | Udemy Blog
ASP.NET Core is a significant redesign of ASP.NET. The most important ASP.NET Core principle I think you have to remember is the modularity. ASP.NET Core is a composition of granular NuGet packages and everything is excluded by default. That means you might need to add some packages when you need some features.

ASP.NET Core - A beginner guide – Thien Nguyen – a developer
ASP.NET provides services to allow the creation, deployment, and execution of Web Applications and Web Services Like ASP, ASP.NET is a server-side technology Web Applications are built using Web Forms. ASP.NET comes with built-in Web Forms controls, which are responsible for generating the user interface.
