Once he's fully grown, you'll want a glass terrarium of at least 40 gallons in volume (that's 32 to 36 inches long) with a screened lid for him to live in. Your bearded dragon is from a warm, dry environment so you'll also need a heating source for his home. Your dragon prefers the solitary life.

Bearded Dragon Care Sheet & Supplies | PetSmart
Bearded dragons are from the dry, arid regions of Australia, therefore dietary needs are provided by native insects and local vegetation. Rainfall, dew, and plant (such as cacti) consumption provides adequate hydration. It is important to replicate their native environment as much as possible when kept in captivity. For instance, a bearded dragon requires proper housing, sufficient light and heat, and a nutritious diet in order to stay happy and healthy.
