Evidence for Bourdieu's social reproduction theory and its contributions to understanding educational inequality has been relatively mixed. Critics discount the usefulness of core concepts such as cultural capital and habitus and most studies invoking these concepts have focused only on one or the other, often conflating the two, to the detriment of both.

Pierre Bourdieu's concept of habitus is frequently drawn upon in work on learning and knowledge in organizations. However, this use is much looser than Bourdieu's emphasis on habitus as generative structure. The last two decades have seen an international explosion of interest in theories of mind, culture, and activity. This unique collection is the first to explicitly reach back to the tradition's original critical impulse within which the writings of Karl Marx played such a central role. Each author pushes this impulse further to address leading contemporary questions. It includes a diverse array of international scholars working from the fields of education, psychology, philosophy, sociology, anthropology, communications, industrial relations, and business studies. Broken into three main sections - education, work, and everyday life - each chapter builds from an analysis of practice and learning as social cultural participation and historical change in relation to the concept of activity, contradiction, and struggle. This book offers insight into an important complex of overlapping practices and institutions to shed light on broader debates over such matters as the 'knowledge economy' and 'lifelong learning'.

Social Theory and the Politics of Higher Education brings together an international group of scholars who shine a theoretical light on the politics of academic life and higher education. The book covers three key areas: 1) Institutional governance, with a specific focus on issues such as measurement, surveillance, accountability, regulation, performance and institutional reputation. 2) Academic work, covering areas such as the changing nature of academic labour, neoliberalism and academic identity, and the role of gender and gender studies in university life. 3) Student experience, which includes case studies of student politics and protest, the impact of graduate debt and changing student identities. The editors and chapter authors explore these topics through a theoretical lens, using the ideas of Michel Foucault, Niklas Luhmann, Barbara Adams, Donna Massey, Margaret Archer, Jürgen Habermas, Pierre Bourdieu, Hartmut Rosa, Norbert Elias and Donna Haraway, among others. The case studies, from Africa, Europe, Australia and South America, draw on a wide range of research approaches, and each chapter includes a set of critical reflections on how social theory and research methodology can work in tandem.

In this volume scholars from around the world focus on how a Bourdieusian stance can enable a powerful socicultural and cultural analysis of literacy education theory and practice and serve as an effective tool in analyzing relations of hierarchy and domination. Although there has been a growing body of Bourdieusian-inspired research in various sectors of education, this book is the first to present both theoretical and practical articulation of his ideas in the field of literacy education. It brings together three major clusters of work: Rethinking of the doxa of the social fields of language and literacy education Explorations of alternative objectifications of educational fields forming around cultural and linguistic minorities, new media and technologies Studies on the formation of the literate habitus in homes and classrooms, curriculum and schooling, and addresses theoretical, policy and practical directions Pierre Bourdieu and Literacy Education is intended for researchers, practitioners, and graduate students in literacy education, sociology of education, and curriculum theory, and as a text for advanced courses in these areas.

A wide range of international contributions draw on theoretical and empirical sources to explore whether alternatives exist to both conceptualise and conduct research into what people do and don't do, in relation to their health and experiences of illness. Presents a collection of international contributions that complement, as well as critique, dominant conceptualisations of health behaviour Includes a wide range of both theoretical perspectives and empirical cases Reasserts the unique contribution social sciences can make to health research Challenges assumptions about the usefulness of the concept of health behaviour A timely publication given the rise of chronic and lifestyle diseases and the resulting changes in global health agendas

This short critical introduction to Pierre Bourdieu's thought is a model of clarity and insight. Where Bourdieu's own writings are often complex, even ambiguous, Richard Jenkins is direct, concise and to the point. He emphasizes Bourdieu's contributions to theory and methodology while also dealing in detail with his substantive studies of education, social stratification and culture. His book provides the best short English-language introduction to Bourdieu's work. 'As Jenkins points out in the final pages of his book, criticism can be the sincerest form of flattery. I particularly relished his critical approach to the work of Bourdieu and believe that he has written a timely introduction which both undergraduates and experienced teachers will find stimulating and enjoyable.'- Mike Hepworth, University of Aberdeen
