Widely spread all over Europe and the world, Content and Language Integrated Learning (CLIL) is the subject of great interest as the ultimate frontier of linguistic and pedagogical research. It impinges on the general cognitive processes involved in learning, on language acquisition and on the development of digital competencies. This volume attests to the spreading of the new "CLIL literacy" in the frame of pluriliteracies, and derives theoretical reflections from case studies and experiential reports, thus addressing both academic and school instructors. It combines research from international CLIL experts with the critical perspectives of academics not directly involved in its instruction.

Mechanics - Microstructure - Corrosion Coupling: Concepts, Experiments, Modeling and Cases presents the state-of-the-art on scientific and technological developments relating to the durability of materials and structures subjected to mechanical and environmental stress in industries such as energy, aeronautics, chemistry and oil. Experimental, theoretical and numerical aspects are tackled at different scales, providing readers with the most advanced tools and scientific approaches to apprehend coupling phenomena by understanding associated mechanisms, identifying variables of the first order, and proposing strategies to control and/or extend the lifespan of structures in a multi-process coupling situation. In addition, the book presents the latest advances in research in these areas (hydrogen embrittlement, stress corrosion, fatigue, etc.), especially in the consideration of the multi-scale aspect of the phenomena in the implementation of dedicated experiments. Reviews the status of scientific and technological developments related to the durability of materials Addresses experimental, theoretical and numerical aspects at different scales Provides the most advanced tools and scientific approaches Focuses on the latest advances, such as hydrogen embrittlement, stress corrosion, fatigue, and more

In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, *Pragmatics of Human Communication* has formed the foundation of much contemporary research into interpersonal communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.

Rebecca's parents were born to very different families. One wealthy, one all but destitute, they were united only by their striking mutual beauty. But the sole child to bless their great romantic fairy tale is a daughter of startling ugliness. The shock of having given birth to such a monster leads the mother to withdraw both herself and her daughter from the world. Only by keeping her child indoors, away from strangers' eyes, can she protect her from their disgust. But against all odds, with a little help from some remarkable friends, Rebecca discovers a talent for music that proves that inner beauty can outshine any other. *A Life Apart* is an irresistible modern fable that will resonate with anyone who has ever felt that they don't belong.
