Security routers Protect industrial network cells easily The new security routers of the FL MGUARD 1100 series allow you to easily and inexpensively protect industrial networks against IT attacks. The on-board functions enable the fast commissioning of devices, even if you only have minimal network and security knowledge.

Security router for the DIN rail - FL MGUARD 1102 ...
In simplest terms, NAT allows many devices on a private network to share a single gateway to the internet. In turn, all of those devices will have the

same public IP address—that of the gateway—and unique private IP addresses. These gateways are commonly found on wifi routers and some VPN services. For example, all of the devices connected to a NAT-enabled wifi router have different private IP addresses, but share the router's public IP address.

What is a NAT firewall, How Does it Work and When Do You ...

Moxa offers industrial secure routers with Gigabit-performance to protect critical assets and provide secure remote access, ensuring defense-in-depth security. Additionally, Moxa

offers IEC 61375-2-5 Ethernet routers that can handle traffic between Ethernet Train Backbones and Ethernet Consist Networks. PRODUCT CATEGORIES (2)
