This book includes multiple choice papers for complementary, beauty and sports therapies. There is one sample paper per ITEC examination subject, e.g. one A&P, one aromatherapy, one reflexology, one massage, etc.

Includes a history of aromatherapy along with information on the principles of plant identification, methods of extracting oils, and aromatherapy massage techniques.

The spa industry is currently the fastest growing segment of the hospitality and leisure industry with revenues exceeding those from amusement parks, box office receipts, vacation ownership gross sales and ski resort ticket sales. Understanding the Global Spa Industry is the first book to examine management practices in this industry and offers a groundbreaking and comprehensive approach to global spa management, covering everything from the beginnings of the industry through to contemporary management and social and ethical issues. With contributions from internationally renowned business leaders, practitioners and academics, this unique book is packed with case studies, examples and advice for all those working in, and studying, the international spa industry. Understanding the Global Spa Industry brings an analytic lens to the spa movement, examining past, current and future trends and the potential for shaping wellness and health services in the 21st century.

The second edition of this book is virtually a new book. It is the only comprehensive text on the safety of essential oils and the first review of essential oil/drug interactions and provides detailed essential oil constituent data not found in any other text. Much of the existing text has been re-written, and 80% of the text is completely new. There are 400 comprehensive essential oil profiles and almost 4000 references. There are new chapters on the respiratory system, the cardiovascular system, the urinary system, the digestive system and the nervous system. For each essential oil there is a full breakdown of constituents, and a clear categorization of hazards and risks, with recommended maximum doses and concentrations. There are also 206 Constituent Profiles. There is considerable discussion of carcinogens, the human relevance of some of the animal data, the validity of treating an essential oil as if it was a single chemical, and the arbitrary nature of uncertainty factors. There is a critique of current regulations.

One man's disappearance throws four women's lives into chaos--who will survive? Vicki works as an aromatherapist, healing her clients out of her home studio with her special blends of essential oils. She's just finishing a session when the police arrive on her doorstep--her ex-husband David has gone missing. Vicki insists she last saw him years ago when they divorced, but the police clearly don't believe her. And her memory's hardly reliable--what if she did have something to do with it? Meanwhile, Scarlet and her mother Zelda are down on their luck, and at eight years old, Scarlet's not old enough to know that the "game" her mother forces her to play is really just a twisted name for dealing drugs. Soon, Zelda is caught, and Scarlet is forced into years of foster care--an experience that will shape the rest of her life . . . David's new wife, Tanya, is the one who reported him missing, but what really happened on the night of

## Where To Download Itec Aromatherapy Past Papers

David's disappearance? And how can Vicki prove her innocence, when she's not even sure of it herself? The answer lies in the connection among these four women--and the one person they can't escape.

Written in a clear, no-nonsense style, this is the ideal textbook for students of complementary therapy up to Levels 2 and 3, nursing, physical therapy, or those studying any course requiring a detailed knowledge of anatomy, physiology and pathology. Designed for use both in the classroom and as a home study resource, it provides all the information necessary to meet or exceed the curriculum requirements of all the major international awarding bodies and incorporates many unique features not found in other texts. This updated and expanded edition complements Ruth Hull's companion text, *Anatomy, Physiology and Pathology Colouring and Workbook for Therapists and Healthcare Professionals*, and: meets the standards required by all the main professional bodies for massage, aromatherapy, and reflexology contains updated graphics and tables throughout to bring the book right up-to-date for today's student interspersed throughout with 'study tips', 'in the classroom', '...in a nutshell', 'did you know?' and 'infoboxes' features comprehensive muscle tables of origin, insertion, innervation, action contains basic pathology of significant diseases and disorders has a study outline, revision and multiple choice questions for each chapter. Endorsed and reviewed by awarding bodies and professional associations and adopted by colleges worldwide.

In *Oncology Massage - an integrative approach to cancer care* the authors have created a textbook which will provide both experienced and inexperienced therapists with a resource to expand their knowledge and understanding of working with people with cancer. Cancer occurrence and survivorship are now so common that every massage therapist will at some time work with clients who have been through cancer treatment. The short and long-term effects of biomedical cancer treatment require massage therapy adaptations to pressure, site, position and duration to provide safe and effective treatments. Informed massage therapists can support the body to promote overall wellness as well as identify the underlying secondary effects of cancer treatment that contribute to physical dysfunction. *Oncology Massage: An Integrative Approach to Cancer Care* provides massage therapists with essential information for: Treatment planning based on the physiology of cancer and cancer treatments Critical, thoughtful treatment decision making Consideration of the psychosocial effects of cancer Enhancing therapist self-awareness and building a therapeutic relationship. The information is presented in a clear and simple format with plentiful use of illustrations and information boxes which allows it to be used both as a learning tool for those new to the field of oncology massage and as a resource for quick referral when working with new patients. The techniques of massage therapy change very little; it is the knowledge and understanding of their use that distinguishes a massage therapist. *Oncology Massage* is unusual in that it includes contributions not only from a range of experienced practitioners but also from people with cancer who have received massage during and after cancer treatment. This feedback from clients provides an invaluable addition to the understanding of how massage can be used as a safe and effective part of cancer care.

Revised and updated, with a new page layout, this edition contains material on facial cosmetics and treatments, skin diagnosis, new products, guidance on the selling role of beauty therapists, and expanded use of tables and charts for skin conditions and products. Exercises and questions are included.

The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, including the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitioners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well-being. This book provides educators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a usable way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly reviewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in practice standards and licensure.

Written in a clear, no-nonsense style, this is the ideal textbook for students of reflexology up to levels 2 and 3. Designed for use both in the classroom and as a home study resource, it provides all the information necessary to meet or exceed the curriculum requirements of all the major awarding bodies. Its benefits include: i meets the current National Occupational Standards for reflexology; i meets the standards required by all the main awarding bodies; i suitable for levels 2 and 3; i outlines each body system, explaining how, when, and why to work the reflexes; i includes chapters on hand reflexology and meridian therapy; i comprehensive pathology of all body systems; i detailed and accurate anatomical drawings; i revision and multiple choice questions for each chapter; i study outline at the end of each chapter; i case studies; i covers current theories and philosophies; i explores other complementary therapies. This book is the perfect complement to Ruth Hull's companion text, *The Complete Guide to Reflexology Workbook*, which guides students through a series of self-revision notes, exercises and mock exam papers all designed to encourage revision, understanding and confidence in practising reflexology.
