Very early (1953) Myford Super 7 with the integral headstock drip-feed oiler, the circular window of which can be seen just to the left of the chuck - this lubrication system was abandoned after a few year's production. Another distinguishing feature of early machines was the clutch contained within the countershaft 4-step cast-iron pulley.

Myford Super 7 and ML7R - Lathes.co.uk
Catalogs, manuals and any other literature that is available on this site is made available for a historical record only. Please remember that safety standards have changed over the years and information in old manuals as well as the old machines themselves may not meet modern standards. It is up to the individual user to use good judgment and to safely operate old machinery. The

For Sale: Unused Myford Super 7B - Lathes.co.uk
However, it is NOT a Myford Lathe Manual. I would advise potential Myford users to obtain a copy of the original Myford Manual which covers weights, dimensions, installation, setup and a number of aspects of maintenance. The Myford Lathe Manual has good lists of spares with exploded diagrams that show what goes where.
