The Economics of Property-Casualty Insurance presents new research and findings on key aspects of the economics of the property-casualty insurance industry. The volume explores the industrial organization, regulation, financing, and taxation of this business. The first paper, on external financing and insurance cycles, contains a wealth of information on trends and patterns in the industry's financial structure. The last essay, which compares performance of stock and mutual insurance companies, takes a fresh look at the way a company's organizational structure affects its responses to different economic situations. Two papers focus on rate regulation in the auto insurance industry, and provide broad overviews of the structure and economics of the insurance industry as a whole. Also addressed are the system of regulating insurance companies in the United States, who insures the insurers, and the effects of tax law changes in the 1980s on the prices of insurance policies.

Those of us on Earth depicts the trials and tribulations of two female alien-born friends who did not anticipate a forbidden love with their earth-alien guides. Yet through various devices, with the assistance of the mafia, the FBI and alien families who escaped to an ancient city in the mountains, they were able to save all of those on earth, seek a defense against the alien ship which threatened Las Vegas and trade advanced technologies to the U.S. Government for the return of a high ranking alien.
