These books provides an overall account of small and medium enterprises in selected Asia-Pacific countries such as Singapore, Malaysia, South Korea, Thailand, Philippines, China, Indonesia, Japan, Australia, New Zealand, United Kingdom and Canada. All of these countries have given high policy agenda on the development of small and medium enterprises since SMEs contribute significantly to the respective national economic development. The books therefore provides various experiences on SMEs, issues and challenges, incentive and policies adopted by various governments and, more significantly, prospects for growth and development potential of SMEs in the new millennium.

While the world's attention has been focused on the spectacular economic success of Japan and Korea, the less developed countries of Asia have often been neglected. Asian Development closes the gap. In nontechnical style and with minimal mathematics, it presents an in-depth perspective on the economic development of fourteen countries in East, Southeast, and South Asia. Asian Development is mainly a story of success. Though some problems remain, Asian countries have shown remarkable resilience in responding to sharp changes in the international economy--oil shocks, world recession and inflation, exchange-rate and interest-rate fluctuations, and rapid technological change. The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies. Looking back they comment: "In the past, growth of the United States and Japan pulled up the growth rates of the smaller economies in the region." Looking forward, they predict: "In the future, increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies."

"This book addresses the issues of HRM in SMEs by providing a channel of communication to disseminate knowledge; including management philosophies, culture, and management practices"--Provided by publisher.
