Weather And Whooping Crane Lab Answers

A: During winter, Whooping Cranes feed mostly in estuaries, mostly on blue crabs and clams, and move to upland areas that were flooded or burned, exposing acorns, snails, mice, voles, crayfish, grasshoppers, and snakes. When they leave Texas, they must switch to a freshwater diet of frogs, fish, plant tubers, crayfish, and aquatic insects; and also on insects and waste grains in harvested fields.

Weather And Whooping Crane Lab Answers

The Whooping Cranes are active in most weather conditions, unless it's raining or very windy. They hunt and search for food daily, so weather doesn't usually have a major impact on them. Overcast days won't provide as good lighting to make the colors on the birds pop, but you'll still see them just fine.
